## SEGUÉS, since 1978 in the fertilization universe

The RAVID is a spreader specifically designed to distribute any kind of fertilizer over vineyards and fruit trees orchards. It can successfully spread from chemical granulated fertilizer to powdered dry organic fertilizer. The distribution can be performed by two spinners, by a side conveyor or by one or two subsoilers to bury the product.

### RAVID 2000 & 3000 key points

- Thin gauge spreader specifically for fertilizing vineyards and orchards
- Wide conveyor to avoid baults making up. 600 mm
- **Four** distribution systems to choose and **exchangeables**
- **VRA** - Variable rate application
- Big product out-hatch
- 100% hydraulically driven
- Hydraulic brake
- Minimum maintenance required
- Easy to handle.

### Fertilizer distributing systems
