

BEACH CLEANER RESORT KL

Resort KL

Professional solution for small and medium sized beaches

The UNICORN Resort KL guarantees the proper cleaning of all kinds of garbage, as well as the oxygenation of the sand, leaving it hygienic and sound.

It is a sieving type machine, which operates by means of a pick up roller, a screening belt, a hopper and a finisher bar.

Due to its medium size dimensions, the UNICORN Resort KL is quick and easy to use and maneuver.

The UNICORN Resort KL guarantees an excellent finishing of the sand

It is suitable for a 40HP mini tractor

It makes the access to the beach or sandy area much easier

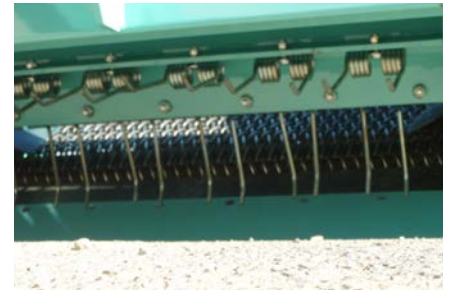

Excellent maneuverability

Centralized greasing system

CHARACTERISTICS

- **Working width:** 1.250 mm
- **External measures:** 3.910 x 1.280 x 1.230 mm high
- **Weight:** 754 Kg
- **Towing vehicle:** Tractor 4x4 of 40 - 60HP
- **Working efficiency:** from 10.000 to 15.000m²/h
- **Working depth:** from 0 to 100mm
- **Hydraulic system to unload the hopper**
- **Hopper capacity of 570l**
- **Two hydraulic connections for the tractor**
- **Power take off 540 rpm**
- **Hitch:** fish mouth type at the towing bar
- **Sieve:** triangular interlocking sieve of carbon steel
- **Tire :** light pressure tire of 26x12.00 - 12
- **Chassis type :** with anticorrosive treatment
- **Surface painting:** PVC protection
- **Air noise emitted:** : less than 70 dBA

Spikes of the frontal roller

Wheels with great buoyancy on the sand

Mechanical drive of the power take off

23mm mesh size

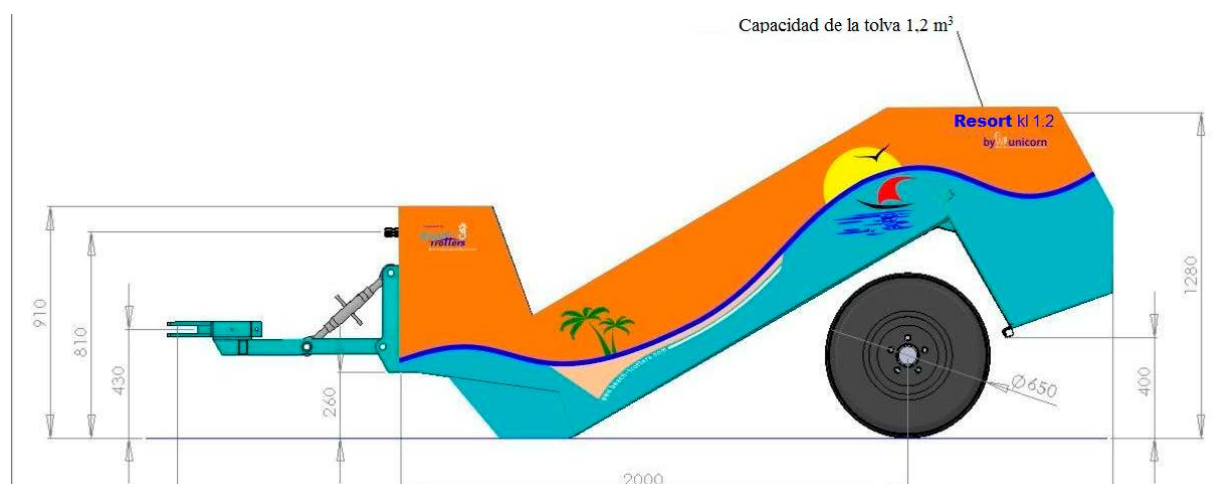

Smoothing of the sand

The screening movement is provided by the cardan drive shaft, which by means of belts, pulleys and gears, transmits motion to the mesh and the frontal roller.

The emptying of the hopper is achieved by two dual - action hydraulic cylinders.

Maintenance of the machine is important, but easy. The most important steps are daily wash, weekly lubrication and mesh and pick up checking.

100% efficient beach cleaners
