MAQUINÀRIA AGRÍCOLA SEGUÉS at the farmer's side since 1978

For the spreading of bulk salt on sidewalks, roads, streets and where autonomous and continuous loading is required, the solution is undoubtedly an LLOP for vans, mini-trucks and the like. Robust and resistant to corrosion by fluxes as it is made entirely of stainless steel.

STREINGTHS POINT:

- Robust and easy to operate spreaders.
- Operation from inside the cabin.
- Manufactured entirely in stainless steel AISI 304.
- Connection to the vehicle battery (12 v) for pick-up vehicles, mini trucks and similar.
- Internal stainless steel auger with high mechanical characteristics.
- Internal protection screen in stainless steel AISI 304.
- Two independent electric motors with reducer, one for the operation of the auger and the other one for the operation of the distribution disc.
- Vibrator to facilitate the salt fall.

STANDARD EQUIPMENT

- PVC protective canopy
- Emergency button
- Rear signal with mandatory arrow on the left side.
- Bipolar cable for connection to the vehicle battery.
- Control panel to operate and adjust the distribution from the cab.
- Support with lights for the placement of the license plate.

OPTIONAL EQUIPMENT

- Full rear camera with monitor for dispersion control.

MODEL	CAPACITY (l)	JOUNEY (Km)	FRAME WIDHT (mm)	FRAME LENGTH (mm)	WEIGHT (kg)
LLOP	1,2	6-8	1.290	1.300	180
