FERTILIZERS RA-TM 10, 15, 20, 25 and 30

MAQUINARIA AGRICOLA SEGUÉS since 1978 perfecting the fertilizer spreaders

"The RA-TM series spreaders offer the precision that characterizes all Segué's machines. They are characterized by a large capacity hopper, with the largest on the market, electronic systems that make a careful and precise distribution with either granular chemical fertilizer or dry manure, dry chicken manure and any type of humid-low fertilizer."

The strengths of the RA-TM series spreaders:

- Actuation of the two distribution discs by means of a hydraulic systems.
- Proportional mechanical conveyor advance in RA-TM10.
- Proportional GPS advance of the tape on the RA-TM15, 20, 25 and 30.
- Wide conveyor belt that avoids the formation of the dome effect when loading due to hardening of the product.
- Large diameter concave discs capable of distributing mineral and organic fertilizer.
- Large diameter traction wheels for less soil compaction and better drag.
- Tandem with auto steering axle on RA-TM15 and 20 models and tridem on RA-TM25 and 30 models.
- Wide compost outlet compound for more precise dosing.
- Suspension lance for a more comfortable drag.

Standard equipment:

- Two hydraulically actuated stainless steel discs.
- Hydraulic service and mechanical parking brake.
- Viewer inside the hopper.
- Position, brake, turn signal and clearance lights.
- Paint and primer of high quality and anticorrosive.
- Tandem with auto steering axle on RA-TM15 and 20 models and tridem on RA-TM25 and 30 models.
- Mechanical support foot for the RA-TM 10 and 15 and hydraulic for the rest.

TECHNICAL CHARACTERISTICS

Model	Tare	Hopper	Width	Height	Length	Wheels
RA-TM10	3.280 kg	8.500 l	2.420 mm	2.540 mm	5.780 mm	520/70R34
RA-TM15	5.420 kg	12.750 l	2.500 mm	2.830 mm	7.492 mm	18.4/15-30
RA-TM20	6.640 kg	17.000 l	2.804 mm	3.000 mm	8.530 mm	520/70R34
RA-TM25	6.940 kg	20.500 l	2.804 mm	3.400 mm	9.190 mm	520/70R34
RA-TM30	7.640 kg	24.000 l	2.804 mm	3.400 mm	10.100 mm	520/70R34

OPTIONAL EQUIPMENT

- Hydraulic cover.
- Electronic proportional distribution system and GPS guidance.
- PES system with display or ICON regulation.
- ISOBUS spreader control system.
- Working width regulator.
- Independent hydraulic circuit.
- Distribution system for granular chemicals.
- Hydraulic distribution disc selector.
- Interior auger for excessively moist fertilizers.
- Galvanized upper screen.
- Auger distribution for lime products.
