FERTILIZER SPREADER RAP

SEGUÉS AGRICULTURAL MACHINERY perfecting fertilization since 1978.

SEGUÉS RAP fertiliser spreaders are synonymous with quality and performance. Designed to be robust, reliable and long-lasting. These machines feature the VICON pendulum distribution system, a guarantee of precision and efficiency. With many years of market leadership and unrivalled satisfaction among its users, SEGUÉS RAP are the perfect choice for those seeking excellence and confidence in every agricultural task.

The strengths of the RAP series fertiliser spreaders:

- Triangular distribution at 18 m using a VICON pendulum unit
- Mechanical distribution system driven by the tractor's PTO
- Hopper with vertical walls to facilitate the drop of the product
- Hydraulic opening/closing of the drop
- Dosing tables for the most common products
- 385/65-22.5 tyres as standard with flotation tyre option
- Swivel and bolted hitch
- Very high resistance of the materials
- Hydraulic brake for service and mechanical for parking
- Access ladder to the hopper

Standard equipment:

- VICON pendulum distribution group
- Hydraulic opening and closing
- Hopper access ladder
- Cardan shaft included
- Hydraulic service brake and mechanical parking brake.
- Position, brake, flashing and clearance lights.
- High quality, anti-corrosion paint and primer.
- Mechanical support foot

TECHNICAL CHARACTERISTICS

Model	Tare	Hopper	Width	High	Length
RAP-5	1.150 kg	4.200 l	2.080 mm	2.200 mm	4.870 mm

OPTIONAL EQUIPMENT

- Adjustable canopy
- Galvanized screen
- 500/50-17 flotation tires
- Transmission with homokinetic joint.
