FERTILIZER SPREADERS LINCE

MAQUINARIA AGRICOLA SEGUÉS since 1978 perfecting the fertilizer spreaders

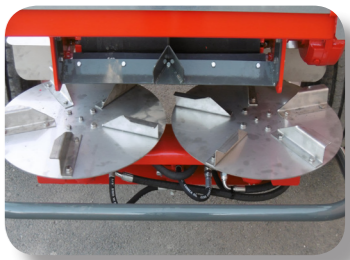

SEGUÉS spreaders have been a benchmark in the agricultural sector for years, thanks to the continuous adaptation of their machines to different market needs. The new LINCE range represents the latest evolution of the brand, offering fertilizer spreaders that stand out for their versatility and profitability, making them an ideal option for various types of crops. In addition, LINCE spreaders provide precise and uniform distribution, optimizing performance and ensuring efficient use of agricultural resources.

The strengths of the LINCE series spreaders:

- Distribution by double centrifugal and stainless disc
- 100% proportional distribution system in mechanical and electronic versions
- Wide width tape to avoid the formation of vaults
- Hydraulic disc drive by means of hydraulic motors
- Adjustable outlet gates for the distribution of any dose
- Large diameter discs capable of distributing mineral and organic fertilizer
- Possibility of electronically regulating the machine
- Very high resistance of materials
- Different capacities that adapt to any need

Standard equipment:

- Two stainless steel spreading discs with hydraulic drive.
- Hydraulic service brake and mechanical parking brake.
- Position, brake, flashing and clearance lights.
- Support foot.
- Anti-corrosive paint.
- Double chute.
- Hopper interior viewer
- Removable rollers
- 385/65 R22.5 wheels

TECHNICAL CHARACTERISTICS

Model	Weight	Hopper	Width	Height	Length
LINCE 5	1.150 kg	4.500 l	2.150 mm	2.530 mm	4.633 mm
LINCE 7	1.800 kg	6.400 l	2.150 mm	2.730 mm	4.633 mm

OPTIONAL EQUIPMENT

- Adjustable awning
- Galvanized upper screen
- 500/50 R17 wheels
- 550/45 R22.5 wheels
