# PSS TRAILED AND SINGLE DISC FERTILIZER

**SEGUES AGRICULTURAL MACHINERY** has been perfecting fertilization since 1978.

The SEGUÉS PSS fertilizer spreaders stand out for their unrivaled design and functionality. Equipped with a robust polyethylene hopper, they guarantee durability and resistance to the most demanding conditions. The drive is 100% mechanical, which ensures simple and hassle-free operation. Thanks to the automatic movement of the wheel when moving forward, the system is activated automatically, allowing a uniform and precise distribution of the fertilizer. In addition, it has a clutch system that allows the operation to be easily interrupted

## The strengths points of PSS spreaders:

- Distribution by centrifugal disc
- 100% adjustable distribution system
- Simple and intuitive manual dosing regulation system
- Mechanical drive of the disc by means of the transmission located on the wheel.
- Regulation of the area of the disc where the fertiliser should fall
- Special systems for salt
- Low maintenance
- Working width from 2 to 14 m

## Standard equipment:

- Polyethylene hopper with stainless steel bottom.
- Stainless steel disc and paddles.
- Agitator and sieve to prevent blockages and entry of foreign bodies.
- Deflector to limit the working width.
- Rear light bar and rotating beacon.
- Manual adjustment system.
- Ball hitch for towing a car, quad...

Deflector

Agitator and sieve

Manual regulation system

Lights and rotary

## TECHNICAL CHARACTERISTICS

Model	Weight	Capacity	Widht	Hight	Lenght	Power
PSS-500	140 kg	380 l	1.960 mm	1.580 mm	1.510 mm	10 cv

## OPTIONAL EQUIPMENT

- Agricultural hitch
- Awning

Ball hitch
